

Environmental Graduate

Environmental Graduates enter a three-year programme at Solid Energy that provides a comprehensive practical introduction to all aspects of mining and the management of environmental effects across all our mine sites.

HOW TO GET INTO THE ROLE:

SECONDARY EDUCATION

- NCEA choices include Science, Biology, Chemistry, Physics or Geography.

TERTIARY QUALIFICATIONS

- BSc or MSc, specialising in Environmental Engineering, Natural Resources, Ecology, Geology, Geological Chemistry, or
- BAppSc in Environmental Management.

TRAINING ON THE JOB

- Two years technical, legislative and organisational development.
- One year specialist interest based.

PIP MCELHINNEY ENVIRONMENTAL GRADUATE

'I have been given the opportunity to work on many diverse projects and within different teams. I have also worked at all our mine sites across New Zealand, both underground and opencast in an assortment of environmental operations, compliance and consenting. External training and mentoring has also helped my personal and professional development'.
