

WHO IS SOLID ENERGY?

Solid Energy, a state owned enterprise, is a major New Zealand energy producer and a leading producer of high-quality coal for export and for New Zealand markets.

At Solid Energy we are building on our proud coal heritage to meet New Zealand's energy needs. We are investing in research and commercialisation of new and more efficient forms of energy from coal, as well as renewables (biomass and biodiesel) to help New Zealand in the transition to clean, affordable and renewable energy forms.

Solid Energy is committed to achieving a positive net effect on the New Zealand environment across all our businesses, and the highest levels of health and safety performance in our workplaces.

Solid Energy recognises that the commitment and dedication of our staff is one of the most important factors for success in our business.

Solid Energy is a dynamic and innovative company. We believe in giving staff the best opportunities and providing them with outstanding personal and professional development programmes. These efforts, and our commitment to high levels of performance, consistently continue to attract exceptionally talented people to our company.
